

Medicare Coverage and COVID-19

Original Medicare-covered services related to COVID-19 include:

COVID-19 testing

Your doctor can bill Medicare for testing provided after February 4, 2020. Medicare covers your first coronavirus test without an order from a doctor other qualified health care provider. After your first test, Medicare requires you to get an order from your provider for any further coronavirus tests you receive. You will owe nothing for the laboratory test and related provider visits (no deductible, coinsurance, or copayment). This applies to both Original Medicare and Medicare Advantage Plans.

COVID-19 vaccine

- As COVID-19 vaccines become available nationally, speak with your doctor or contact your public health department to learn more about your eligibility to receive the vaccine and its availability in your area. The federal government has paid for the cost of the vaccine for all people, and Original Medicare Part B covers the cost of administration of the vaccine to Medicare beneficiaries, regardless of whether you have Original Medicare or a Medicare Advantage Plan.
- **Bring your red, white, and blue Medicare card with you to your vaccination appointment, even if you have a Medicare Advantage Plan.** If you do not have your card on you, your vaccine provider may ask you for your Social Security number so that they can look up your Medicare information.

COVID-19 antibody treatment

Medicare covers monoclonal antibodies to treat COVID-19. You will owe no cost-sharing (deductible, coinsurance, or copayment).

Telehealth benefits

A telehealth service is a full visit with your doctor using video technology. During the public health emergency, Medicare covers hospital and doctors' office visits, mental health counseling, preventive health screenings, and other visits via telehealth for all people with Medicare. You can access these benefits at home or in health care settings. You may owe standard cost-sharing (like a coinsurance or copayment) for these services, but contact your provider to learn more. If you have a Medicare Advantage Plan, contact your plan to learn about its costs and coverage.

Prescription refills

If you want to refill your prescriptions early so that you have extra medication on hand, contact your Part D drug plan. Your plan should remove restrictions that stop you from refilling most prescriptions too soon.

Medicare Advantage Plans must cover everything that Original Medicare does, but they can do so with different costs and restrictions.

How to access care during a public health emergency

During a public health emergency, Medicare Advantage and Part D plans must work to maintain access to health care services and prescription drugs.

Medicare Advantage Plans must:

- Allow you to receive health care services at out-of-network doctor's offices, hospitals, and other facilities
- Charge in-network cost-sharing amounts for services received out-of-network
- Waive referral requirements
- Suspend rules requiring you to tell the plan before getting certain kinds of care or prescription drugs, if failing to contact the plan ahead of time could raise costs or limit access to care

Part D plans must:

- Cover formulary Part D drugs filled at out-of-network pharmacies
 - Part D plans must do this when you cannot be expected to get covered Part D drugs at an in-network pharmacy
- Cover the maximum supply of your refill at your request

Contact your State Health Insurance Assistance Program (SHIP) if you need help understanding what Medicare covers and how to access care.

To Find Your SHIP
Toll-Free Phone Number: 877-839-2675 (When asked for the purpose of your call, say "Medicare.")
